

# Reimagine true internet possibilities

✔ Enhance your business ✔ Maximize your infotech ✔ Get there first

MANAGED IT SUPPORT

NETWORK SECURITY

UNBREAKABLE INTERNET

## TELETRONIC SYSTEMS INC.

TSI has over 60 years of proven leadership in digital innovation and transformation.

Counted among TSI's achievements include the past stewardship of Retelco, Philippine Telegraph and Telephone (PT&T), Capwire (CWI), and Pocketbell (PWI). TSI has taken these companies from start-up to technology and category leaders.

Most recently, TSI launched its unbreakable, secure, and mission-enabling managed IT and ISP service, bedoo, Reimagine True Internet Possibilities, in 2020. The service has begun making a real impact on the organizations we are serving, in terms of unlocking productivity from their ICT and enabling better results.

As part of bedoo, TSI also offers unbreakable internet, highly available networks, seamless online collaboration tools, custom applications, IT project integration, and project management.

# COMPANY PROFILE

Since 1962, Telectronic Systems, Inc (TSI) has been creating and providing innovative communication and technology services, offering a range of digital Information and Communication Technology (ICT) firsts.

We are a team of experts with years of experience in ICT. We build and help businesses grow and achieve stronger results through the use and application of leading information technology.
