

Bill Miller Bar-B-Q

Popular Texan Barbecue Restaurant Chain Enhances Email Protection with FortiMail

“The threat landscape is getting more challenging, and we need to ensure we have the best defenses available. Partners like Fortinet are integral to helping ensure we keep our business secure while freeing our people to do what they do best—provide great customer service.”

– Robert Collazo, Director of Information Technology, Bill Miller Bar-B-Q

Bill Miller Bar-B-Q, a Texas restaurant chain with 82 locations, faced a surge in phishing emails, especially spear phishing attacks, after transitioning to Microsoft 365. To enhance email security, they recognized the need for employee training and sought a system to combat phishing. After a successful demo with Fortinet, they implemented FortiMail Cloud, which reduced spam by about 40% in the first week. The small IT team values its user-friendly interface, automation, and minimal administrative demands while continuing to explore its features to improve security.

Business Impact

Improved ability to defend against spear phishing attacks

Rapid decrease in recipient spam, with 40% cut off at source

Employees enabled to focus on core customer service roles

Time saved for IT team thanks to automated security capabilities
